

Install a New Magento Theme

Applying a custom Theme

Tutorial: Setup a new custom theme for your new Magento store

Thanks for downloading a theme from [MagThemes.com](https://magthemes.com)! Now that you have your theme, it's time to get started on installing it on your current Magento store. Follow the step-by-step instructions and you'll be ready to start selling in minutes.

1. Upload these folders to your website:

```
/skin/frontend/default/NewTheme  
/app/design/frontend/default/NewTheme
```

Your folder will be called something other than "NewTheme".

2. Login to the Admin

3. Navigate to System > Configuration > Design

4. Under the Themes section:

- Type the name of your theme in Templates, Skin and Layout.
In this example the name of our theme would be NewTheme.
- Type **default** in the Default textbox
- Click **Save Config** at the top of the screen

Congratulations your new theme is now ready to go!
